

Miracote One

Single Component - Polymer-modified - Cementitious Micro-topping

Product Features

- Single component - Just add water
- Economical and Durable
- Ideal for interior & exterior use
- Brilliant adhesion to most substrates
- Enhances curb appeal
- Extensive selection of colors
- Can be integrally pigmented or stained
- Excellent canvas for all stain processes
- Zero VOC - meets LEED point criteria

High Strength Micro-Finish Topping

Miracote One Smooth and **Miracote One Regular** are both a single component, polymer-modified, cementitious, micro-topping that only require the addition of potable water on site for use in resurfacing and beautifying concrete and other compatible substrates. **Miracote One Smooth**, an extremely fine powder, is designed and intended for use as a microtopping grout or finish coat over the base coat of **Miracote One Regular**. **Miracote One** is ideal for indoor or outdoor use; simply add water to the product; excellent adhesion to most substrates; and the end result is a new canvas for color and stain. **Miracote One** comes in proprietary blends of white and natural gray powder.

Miracote One can be integrally pigmented with Miracote ColorPax-LIP; stained with water-based Mirastain; or pigmented and stained to achieve a limitless choice of uniquely distinctive finishes. **Miracote One** requires a protective sealer or top coating application. Select appropriate Protective Sealer or coating from MiraGard, MiraFlor, or Mirathane product technology groups.
