

Step #	Installation Step	Installation Methods	Products & Mix Ratios	Theoretical Coverage Rates		
Miraflex II - Steps 1 through 10 - Basic Foundation over Plywood Substrates (West Coast Only)						
1	Prime Metal Flashing with MiraFlex Membrane B	a. Brush or b. Roll	MiraFlex Membrane B (Single Component)	400 Ln Ft per gallon		
2	Install Expanded Metal Lath	a. Place lath by hand	1.75 # per Square Yard, galvanized steel In compliance with ASTM C-847 Use coated staples	(1) Sheet = 18 SF		
3	Mechanically Fasten Lath with Staples Note: Butt lath sheets together - do not overlap.	a. Electric or Pneumatic Staple Gun	No. 16 gauge steel, 1" wide crown and 1/2" leg length In compliance with ASTM F-1667	22 to 28 Staples/SF		
4	Prime Wood with MiraPrime Universal (Miracote MPC Liquid Catalyst Diluted with Water)	a. Hudson-type sprayer	Blend Miracote MPC Liquid Catalyst and Potable Water Mix Ratio Miracote MPC Liquid Catalyst:Water = 1:1	400 SF/Gal		
5	Install MiraPatch LM	a. Hand trowel or b. Screed	Blend MiraPatch LM Mix Ratio 1.25 Gal MiraPatch RM 3 Liquid to 1 50# Bag MiraPatch LM	43 SF @ 3/16"		
Optional 6	Prime MiraPatch LM >90°F required Note: Primer is not required when applied within 48 hours or if RM surface has not been contaminated.	a. Dip and Roll b. Notched Squeegee and Backroll	Blend MiraFlex Membrane A and Potable Water Mix Ratio MiraFlex Membrane A:Water = 1:1	400 SF/Gal 4 mils WFT 2 mil DFT		
7		a. Notched Squeegee/Trowel and Lightly Backroll b. Dip and Roll	MiraFlex Membrane A Neat (Single Component)	64 SF/Gal 25 mils WFT 12.5 mils DFT		
8	Apply 2nd Coat of MiraFlex Membrane A with Miracote Poly Fabric Note 1: Apply the second membrane coat @ right angles to the first membrane coat. Note 2: Exercise caution before proceeding to Step #8. MiraFlex Membrane"A must be dry, clean and free of surface contaminants that may effect adhesion.	a. Dip & Roll b. Trowel	MiraFlex Membrane A with Miracote Poly Fabric (110" or 40" Wide Roll)	50 SF/Gal 32 mils WFT 16 mils DFT		

Step #	Installation Step	Installation Methods	Products & Mix Ratios	Theoretical Coverage Rates				
	Apply 1st Miracote MPC Coat	a. Hand Trowel or	Blend: Miracote MPC Liquid Catalyst and MPC Powder					
		b. Magic trowel or	Mix Ratio: 5 Gal Miracote MPC Liquid Catalyst to (2) 55# Bag	js				
		c. Squeegee or	Note: Climatic conditions that are associated with high rates	500 SF/Unit				
		e. Hopper Gun or	of evaporation can decrease MPC working time. Add 1 unit					
9	Note 1: ColorPax LIP (Liquid Integral Pigment)	f. Similar spray method	of Miracote Retarder to increase valuable working time					
	packs must be dispensed and mixed into the	(Low Pressure 8 -15 psi)	when these conditions are present or anticipated.	Note: MPC coverage can vary				
	5 Gal pail of Miracote MPC Liquid Catalyst.		Mix Option 1 (Not Pigmented)	depending on the desired				
	Note 2: Color-Pax LIP pigmented Miracote MPC colors	Note: Recommended nozzle	Mix Gray or White Regular MPC	texture of finish, and the profile				
	are based on use with White powder. The use	tip size of 8mm or 1/4"	Mix Option 2 (Pigmented)	or condition of the existing				
	of Gray powder will produce a different color.		Mix Gray or White Regular MPC with (1) ColorPax-LIP Unit	concrete substrate.				
	Apply 2nd Miracote MPC Coat	a. Hand Trowel or	Blend: Miracote MPC Liquid Catalyst and MPC Powder					
		b. Magic trowel or	Mix Ratio: 5 Gal Miracote MPC Liquid Catalyst to (2) 55 # Bag	500 SF/Unit				
10		c. Squeegee or	Mix Option 1 (Not Pigmented)					
	Note: Refer to the appropriate MPC Installation	e. Hopper Gun or	Mix Gray or White Regular MPC	Note: MPC coverage can vary				
	Guideline for the desired final finish or texture, i.e.	f. Similar spray method	Mix Option 2 (Pigmented)	as noted above.				
	Knockdown, Broom, Stipple, Stencil/Tape Pattern.	(Low Pressure 8 -15 psi)	Mix Gray or White Regular MPC with (1) ColorPax-LIP Unit					
	Miraflex II	- Step 11 - Apply MiraGard	d Colorbond XL Pigmented Top Coats					
	Apply 2 Top Coats of MiraGard Colorbond XL	a. Dip and Roll or	MiraGard Colorbond XL	250 - 300 SF/Gal				
11	(Required for Specification Compliance)	b. Airless Spray	Single Component					
				Note: MiraGard Colorbond XL				
				overage rate can vary depending				
				on the desired texture of finish.				
	Miraflex II - Step 12 - Apply Clear Sealer Coats - Optional when MiraGard Colorbond XL is Used							
12	Choose any of the Miracote sealers or topcoats for best results depending on location, service, use and exposure. Refer to the Product Technical Data Sheets and Installation Guides for Miracote MiraGard HDWB, MiraGard HD 400, MiraGard HD 100 or MiraThane WB.							

Notes: Prior to starting the application of any Miracote Product or System be sure to read the Installation Guides, Product Technical Data Sheets, MSDS and other pertinent documents published by Crossfield Product Corp. for information, including but not limited to, Precautions, Limitations, Disclaimers and Warranties.

Pay special attention to substrate moisture content, physical condition of the substrate, method(s) of surface preparation, surface restoration, detailing of cracks, joints, transitions and terminations, and any applicable specifications. Review carefully for unknown site conditions or defects.

The theoretical coverage rates stated in the Installation Guides are for estimating purposes only. Factors, such as, allowance for material waste, unusual or abnormal substrate conditions and other unforeseen job site conditions that may affect actual product yields are the responsibility of the installer.
