

Top Reasons: Miracote Miracle System

Miracote MPC Park Deck System meets every need in the growing demand for materials designed to restore, protect, and beautify concrete surfaces.

Miracote products, by Crossfield Products Corp., provide technologies for plywood and concrete protection and restoration by offering a complete line of protective coatings, waterproofing membranes, and repair materials in a wide range of colors, textures, and patterns. They are also environmentally-friendly: water-based, solvent-free, and easy to use.

Here are the TOP 10 REASONS why Miracote MPC Park Deck System is the value-engineered solution to maintaining valuable structures:

1. Product Formulation

Miracote's proven unique chemistry protects the parking structure from its greatest threat: trapped moisture in the concrete substrate. This vapor-permeable coating allows water vapor to migrate into the atmosphere, reducing the potential for corrosion to rebar, supports, and anchors.

2. Strong Support Team

Contractors using Miracote MPC Park Deck have access to a nationwide team of technical experts to help with every phase of the project. Their technical experts provide specifying information to designers, architects, and facility managers during planning. Crews can also attend regional training courses by a local distributor.

3. A Product for Every Pattern

Miracote MPC Park Deck carries durable products designed for exterior, interior, and pedestrian applications that even match the wear surface depending on traffic conditions. Miracote MPC Regular Powder is ideal for parking stalls and drive lanes. Miracote MPC

Hard Powder contains aluminum oxide aggregate for enhanced abrasion resistance on turn lanes and entrance and exit ramps.

4. No Callbacks

The special formulation creates a special chemical bond between the coating and concrete eliminating service interruptions from blisters or bubbles. The smooth final surface lessens damage from tears from maintenance even on damp concrete substrates.

5. Value-Engineered Solution

Miracote MPC Park Deck offers the design and construction team options that match product uses to the project needs. By customizing the job specifications, you are in control of the total construction cost.

6. Reduced Ownership Costs

Miracote MPC Park Deck provides reduced life-cycle costs. The coating prolongs the service life of parking decks by protecting against damage from common problems like water, chloride attack, and carbonation.

7. Simple Application

Miracote MPC Park Deck includes only one coating product for the desired buildup. One

product means easier ordering, storage, and job site coordination.

8. Less Jobsite Waste and Cleanup

With Miracote MPC Park Deck, cleanup gets easier. The aggregates are mixed into the coating during application, eliminating the extra steps of broadcasting or the recovery, saving time and yields a more consistent coating appearance.

9. Weather Protection

Miracote MPC Park Deck is less sensitive to weather conditions. It's better bonding quality lessens damage from rain and snow.

10. Safer Job Sites

Miracote MPC Park Deck is safe to use. Applicators review one set of MSDS documents before the project. Workers also breathe easier since the system contains no VOCs. ■
