

# MPC PARK DECK

## Two-component, Polymer-modified, Cementitious Traffic Deck Waterproof Coating

MiraFlex MPC Park Deck restores and protects concrete from water intrusion, chlorides, freeze thaw damage, carbonation and impact/abrasion of vehicular traffic. It's extremely durable, cost-effective, and "breathable," allowing moisture vapor to escape - reducing corrosion of steel reinforcing and eliminating blistering or delamination.

### Where to use:

- Concrete Restoration and Protection projects
- Waterproofing protection on new and existing parking decks
- Horizontal surfaces, columns, walls and ceilings
- Restoration and protection for stadiums and sports arenas
- Waterproofing and protection of balconies and breezeways

### Applications:

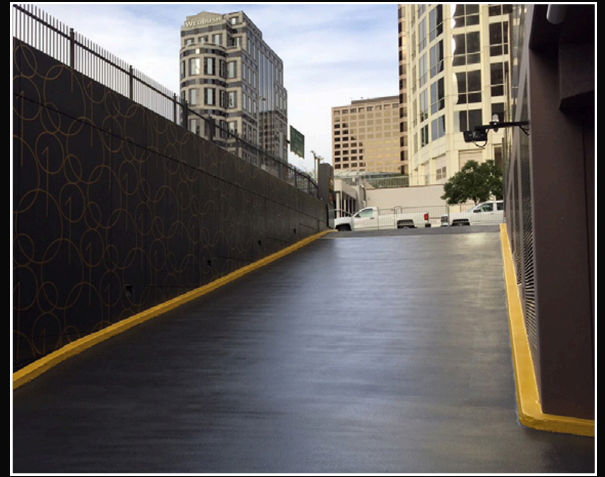

- Concrete slabs on-grade
- Concrete decks over non-vented metal pan
- Concrete topping slabs over sandwich membranes
- Precast concrete parking structures
- Ramps and helixes
- Excellent for use on parapets, columns, and vertical surfaces
- Concrete toll booth lanes
- Truck loading docks and aprons

# MPC PARK DECK

Two-component, Polymer-modified, Cementitious Traffic Deck Waterproof Coating

## Advantages:

- Moisture vapor permeable - reduces potential for corrosion
- Protects against penetration of water, chlorides and carbonation
- Ideal for exterior/interior, pedestrian and vehicular traffic
- Excellent adhesion to damp concrete substrates
- Lower labor and material costs
- Reduced life cycle costs - prolongs service life of parking decks
- One product for all three coats
- No broadcasting or recovery excess sand
- Less sensitivity in adverse weather conditions
- No odor - VOC and LEED compliant
- Reduced corrosion when applied with MiraPrime Aqua-Blok XL
